yassernamez03 | yasser-namez | yassernamez.tech

Fourth-year Software Engineering student at ENSET Mohammedia, passionate about **AI/ML** and **full-stack development**. Hands-on experience building web applications and integrating intelligent systems. Strong team player with proven **leadership** in student clubs. Keen problem solver **seeking a PFA internship** to build smart, user-focused software.

EDUCATION

Software & Information Systems Engineering, State Engineer Degree — 2024 – 2027
ENSET Mohammedia, Hassan II University — Mohammedia

Data Science & Artificial Intelligence, Bachelor of Technology — 2023 – 2024
Higher School of Technology (EST), Meknes — Meknes

Data Science & Business Intelligence, University Diploma — 2021 – 2023
Higher School of Technology (EST), Essaouira — Essaouira

EXPERIENCE

Software Engineer Intern | INEOS Cyberdefense – Casablanca (2 months) — Jul 2025 – Aug 2025

- Built a full-stack app with **FastAPI** and **React**, integrating multiple REST APIs using clean architecture patterns.
- Designed an **AI-powered module** using **LangChain** to automate structured recommendations from unstructured data.
- Developed an async report generation service with **Celery** and **Redis**, containerized with **Docker**.

Full Stack Developer Intern | Union Concept – Rabat (4 months) — Feb 2025 – May 2025

- Built a modular **ERP platform** with **Spring Boot** and **React**, applying OOP design patterns across multiple business modules.
- Implemented secure auth (**JWT/OAuth2**) and **role-based access control** with Spring Security.

Machine Learning Engineer Intern | CHU Mohammed VI – Oujda (3 months) — Apr 2024 – Jun 2024

- Developed a **Flask REST API** serving **TensorFlow** model predictions for medical image segmentation (**EfficientNet**, **UNet**).

Software Engineer Intern | AgilOrg – Marrakesh (3 months) — Apr 2023 – Jun 2023

- Built a hotel management system on **Odoo (Python)** with a **PostgreSQL** backend, covering reservations, billing, and room workflows.

PROJECTS

Agentic RAG Documentation Platform *(github.com/yassernamez03/Agentic-RAG-Documentation-Platform)*

- Built an **Agentic RAG** system where a **GPT-4** agent autonomously decides to query internal docs, search the web, or both returning cited, multi-source answers.
- Implemented **semantic vector search** using **OpenAI embeddings** and **Supabase pgvector**, with role-based access control and a real-time analytics dashboard.

Career Counseling Chatbot *(github.com/yassernamez03/TARI9-AI)*

- Built an AI-powered career counseling chatbot using **LangChain** and **HuggingFace** for personalized guidance, with a **Flask** REST API and a deployed frontend on **Vercel**.

TECHNOLOGIES

Languages: Java, Python, JavaScript, TypeScript, SQL, C, R, Go
Backend & Web: Spring Boot, FastAPI, Flask, Node.js, Express, React, Next.js, Tailwind CSS, Shadcn, WebSocket, LangChain
Databases & Search: PostgreSQL, MySQL, MongoDB, Redis, ChromaDB
DevOps & Cloud : Docker, GitHub Actions, Jenkins, Terraform, AWS, Kubeflow, Linux

CERTIFICATIONS

Associate AI Engineer for Developers: DataCamp — Feb 2026
OCI Data Science Professional: Oracle — Nov 2025
Machine Learning Specialization: DeepLearning.AI — Jan 2024
EF SET English Certificate – C2 Proficient: EF SET — Jan 2026
